

ABHILASH KONDA

DevOps Engineer | Cloud Infrastructure | CI/CD Automation
6303871757 | abhilashkonda11@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven DevOps Engineer with 2+ years of experience in cloud-native infrastructure, CI/CD automation, and containerized workloads. Delivered 40% reductions in deployment time and downtime via Kubernetes, Docker, Jenkins, and Terraform. Skilled in DevSecOps, IAM (OAuth2/OIDC/SAML), ForgeRock, and GenAI/LLM tooling. Multi-cloud certified: AWS, GCP, Azure.

CORE COMPETENCIES

CI/CD (Jenkins, GitLab CI, GitHub Actions) • Kubernetes & Docker • Kubernetes Gateway API • Terraform IaC • AWS / GCP / Azure • DevSecOps (SAST/DAST) • Helm • Prometheus & Grafana • IAM (OAuth2, OIDC, SAML, RBAC, MFA) • ForgeRock • ELK / Loki / Fluent Bit • Layer 7 Traffic Management • mTLS • Python & Bash • GenAI / LLM • Blue-Green Deployments • SRE Principles

WORK EXPERIENCE

Software Engineer | Sechay Solutions India Pvt. Ltd. Mar 2024 – Present

CI/CD & Infrastructure Automation

- Architected Jenkins + Helm CI/CD pipelines for Kubernetes, cutting manual deployment effort by 40% and accelerating release velocity.
- Containerized workloads with Docker; automated pod rollouts via GitHub webhooks, reducing production downtime by 40%.
- Provisioned AWS infrastructure (EC2, VPC, IAM, S3) via Terraform IaC; deployed Blue-Green strategies improving release speed by 25%.
- Built Prometheus-Grafana + Loki/Fluent Bit observability stack, reducing incidents by 15%; automated API regression via Newman, cutting QA effort by 30%.

Identity & Access Management (ForgeRock / IAM)

- Deployed ForgeRock Identity Platform on Minikube, reducing environment setup time by 60%; implemented SSO (SAML/OIDC), MFA, and step-up authentication.
- Enforced RBAC and IAM policies using OAuth2, OIDC, and PKCE, reducing identity-related security risks by 30%.

GenAI & LLM Engineering

- Building private on-premise GenAI agent (Python) for secure enterprise LLM deployment with domain-specific fine-tuning and prompt-engineering frameworks.

KEY PROJECTS

Enterprise Web App — DevOps & DevSecOps Transformation | Docker, Kubernetes, Jenkins, AWS, Terraform, Prometheus, Grafana, ELK

- Led microservices migration to AWS with Docker/Kubernetes; built Jenkins CI/CD with SAST/DAST and Blue-Green deployments, cutting downtime by 20%.
- Automated infrastructure provisioning via Terraform; configured Prometheus-Grafana dashboards for real-time observability and alerting.

NGINX Ingress → Kubernetes Gateway API Migration | Kubernetes Gateway API, Helm, Terraform, AWS, Prometheus, Grafana

- Led end-to-end NGINX Ingress replacement with Kubernetes Gateway API across dev, QA, and prod (ForgeRock 7.3→7.5), enabling HTTPRoute-based traffic control and reducing config complexity by 35%.
- Automated Gateway API manifest rollouts via Helm and Terraform; integrated Prometheus-Grafana observability, reducing ingress incident MTTD by 40%.

TECHNICAL SKILLS

Operating Systems: Linux (Ubuntu, CentOS/RHEL), Windows

CI/CD & Automation: Jenkins, GitLab CI, GitHub Actions, Helm, Bash scripting

Cloud Platforms: AWS (EC2, S3, IAM, VPC), GCP, Azure

Containers & Orchestration: Docker, Kubernetes, Kubernetes Gateway API, HTTPRoute, GatewayClass, Minikube

Networking & API Gateway: Kubernetes Gateway API, NGINX Ingress, HTTPRoute, Layer 7 Traffic Management, mTLS, Service Mesh

Infrastructure as Code: Terraform, YAML

DevSecOps & IAM: SAST/DAST, OAuth2, OIDC, SAML, RBAC, ForgeRock, MFA, SSO

Monitoring & Logging: Prometheus, Grafana, Loki, Fluent Bit, ELK Stack, Splunk

Languages & DB: Python, Java, Bash | MongoDB, MySQL

GenAI / ML: LLM fine-tuning, private agent development, prompt engineering

CERTIFICATIONS

Google Cloud – Associate Cloud Engineer (2023) • Ping Identity – PingAM Professional (2024) • AWS Cloud Practitioner (2024) • Azure Cloud Concepts (2024)

EDUCATION

B.Tech in Computer Science & Engineering — BVRIT, Narsapur, Telangana | CGPA: 8.0 / 10.0 | May 2024
